Forecast for Saturday 15 Aug 2020

Weather: Cloudy through much of the morning with the odd spot of drizzle and patches of hill fog likely. Drier with some brighter spells developing from late morning especially in the west. Showers then developing from the south through the evening with a low risk of thunder. Cloud again spreading in from the east. Feeling humid throughout.

Chance of cloud free mountain/hill tops above 600m: 20% initially, but with a higher chance in the west. Widespread bases down to 500m, and patches down to 300m. Increasing to 70% from late morning, with only isolated bases down to 400m. Becoming around 10% through the evening with encroaching cloud from the east down to 300-500m.

Visibility: Generally poor or very poor in the low cloud with nearby landmarks often obscured. Becoming moderate or good with distant hills visible outside of the cloud.

Meteorologist's View

Low cloud could quickly lead to navigation difficulties. High humidity means it will feel warm and sticky.

Recent rainfall: measured at Malham: altitude 375m

Forecast for Sunday 16 Aug 2020

Weather: A showery day, these occasionally heavy with a risk of thunder. This will be accompanied by widespread low cloud and patches of hill fog. Showers perhaps easing through the day, but staying cloudy into the afternoon, with a further risk of heavy and thundery showers after dusk.

Maximum wind: Northeasterly 15-20mph with gusts 25-30mph at first, easing through the day.

Chance of cloud free mountain/hill tops above 600m: Less than 10% with risk of hill fog through much of the day, bases occasionally falling to 300m.

Visibility: Frequently poor or very poor in the low cloud or heavy showers, otherwise moderate.

Temperature: **Valleys:** Plus 14 becoming 21 Celsius.
At 600m: Plus 12 Celsius.
Freezing level: Well above the summits.
